---

September 10th. , 2021 â€” Every week I receive emails from viewers reporting that they have been hacked on Facebook: â€œLast week, my Facebook account, which I have been using for 15 years, was ... blocked. I called Facebook and asked what was the matter. I got multiple lines based on security policy. I thought it was a little... I was surprised when they said, "Oh, we can delete your contacts because no one can text you while you were abroad." I asked what happened to their security system and they said no, we are still on the client side and this is not a security issue. You must follow the rules and be careful.
