private void  
FontFamilyConverter_Changed(object sender, EventArgs e) { Title.InnerText =

Get the FontFamilyConverter type from NuGet. You have also an option to use the Microsoft.Xaml.StyleControls nuget in more features. Here is the link for the other nuget: Microsoft.Xaml.Tests

When I use the API within the API reference, it's got you to install Microsoft.Tools.WindowsInstallerXaml (Windows Installer XML Toolset) to get the Xaml Parser as part of that nuget. You can get the API reference of the FontFamilyConverter from the nuget. It is present inside the namespace Microsoft.Xaml.StyleControls.Api (As @simonThomas asked in the comment).
